

Engineers Should not do Pizza Delivery in Canada!

(Licensing Informative Program)

*Newcomer & Newly Graduates
with
Engineering Degree*

CIVILTECH
EduHub INC.

“From time I dreamed about working in Canada as a professional engineer, I realised the importance of having a mentor being with me during the complicated/long process of **PEng** licensing. I don't want *you* to suffer from this need.”

Ahmad Shahroodi, PEng

President at CivilTech EduHub Inc.

CivilTech EduHub Inc.

We are a society of experienced professional engineers. Our mission is to help engineering degree holders peruse their professional dreams in Canada.

Whether a newcomer with years of international experience, or a recent graduate; we will provide you with the entire transferable essential to obtain your **PEng** license.

Consider us a friendly hand!

We encourage you to Think again!

To get involved in the Canadian engineering society, you need proper training and licensure.

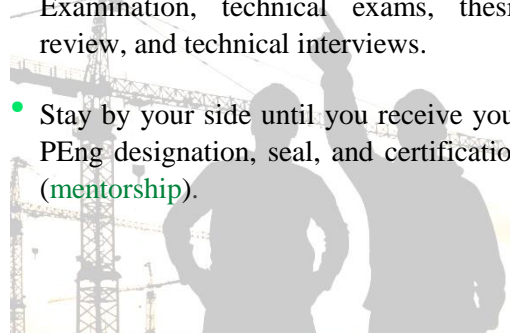

Under the *Professional Engineers Act*, if an applicant is willing to practice professional engineering, he/she is required a professional engineering licence (PEng). In the province of Ontario, the Professional Engineers-Ontario (PEO) is responsible for engineering licensing.

At *CivilTech*, we will educate our valuable clients about the process of licensing and stay with them through this long and complicated path. We will help them prepare for exams and submit their engineering experience record.

We offer:

- **Informative seminars/workshops** about the structure of your engineering association, its functionality and process of licensing.
- Prepare your **application package**.
- Review your transcripts and implement accurate course description according to your Canadian engineering standards. We will help you to certify your **academic requirements**.
- **One-to-one consulting** sessions by experienced PEng. Engineers.
- Preparation sessions for the **examinations**: Professional Practice Examination (PPE)-Law & Ethics Examination, technical exams, thesis review, and technical interviews.
- Stay by your side until you receive your PEng designation, seal, and certification (**mentorship**).

Our Unique PEng Package

Our PEng licensure package contains five phases. Your mentor stays with you along all those steps.

Phase 1

Application package & academic requirements

Phase 2

ARC interview, Technical Examination (if any exam is assigned), thesis summary, and technical interview

Phase 3

Preparation for the Professional Practice Examination (PPE)

Phase 4

Engineering Experience Record drafting and possible training for the ERC interview.

Phase 5

CPD Package Preparation (helping you maintain your license)
